SLA Types for User Groups, Tool Groups, QoS

4/14/2014 SLA Types

	Description	Max. Concurrent Users	Max. Concurrent Virtual Machines	Max. Data Size (GB)	OLTP sladetailsp. Time (ms)	OLAP Resp. Time (ms)	Availability
◉	Best quality with all roles and maximum number of users	50	5	10	1	5	99
○	Fewer users for all roles, moderate QoS	40	3	6	2	8	97
○	Only data scientists, operators and query users with high QoS	30	4	8	1	5	99
○	Only data scientists, operators and query users with moderate QoS	20	2	5	2	8	95
○	Only admin, management and query users with high QoS	25	4	6	1	5	99
○	Only admin, management and query users with moderate QoS	20	3	4	2	8	95
○	Only data scientist, data operator and domain expert with high QoS	15	4	8	1	5	99
○	Only data scientist, data operator and domain expert with moderate QoS	10	3	6	2	8	95
○	Only query users with high QoS	20	3	6	1	5	99
○	Only query users with moderate QoS	15	2	4	2	8	95
○	Test accout all roles and maximum two users per role with moderate QoS	3	2	1	2	8	95
○	Single user account all roles with high QoS	1	5	5	2	3	98

Available Tools:	User Mix
IBM InfoSphere Stream IBM SPSS Modeler 15.0 Cognos Xpress IBM BigInsights Weka	Guest Data_opr Data_sc Dom_exp Dom_prac
